

MetaSquare

What if there were a hybrid job that pushed you to learn cutting-edge technologies, gave you opportunities to provide innovative solutions to various emerging clients, pushed you to fix the most complex technical problems, and equipped you to train the growing population of MetaSquare users? Well, enter stage left a new position we just opened. Our new Consultant position is a cross between consulting, technical support, and training. We're looking for people who love open source, enjoy wearing multiple hats, and want to grow with a company that's bursting at the seams. Apply now and tell us why you'd like to join the MetaSquare family.

Major Objectives

- Provide technical leadership and guidance in the installation, configuration, and implementation of MetaSquare's Java-based technologies.
- Amaze clients by planning, designing, building, and delivering innovative solutions out of the box or through customizations
- Maintain the confidence of both customers and colleagues in MetaSquare products and technologies
- Deliver projects quickly, cost-effectively, and with the highest quality.
- Communicate. Efficiently.
- Conduct engaging MetaSquare trainings for key customers.
- Fix product defects to ensure successful deployment of client projects.
- Potential to travel up to 50-75% of the time to customer sites to provide face-to-face technical solutions or trainings.

Note: As in any fast-paced, agile environment, the list above is just some of the challenging opportunities you will tackle. You'll excel if you are able to enthusiastically overcome hurdles, quickly adjust to changing priorities, and have a blast working with a crazy fun team.

Preferred Qualifications

- Love for cutting-edge technology
- Bachelor's Degree in Computer Science or Computer Engineering, or equivalent level of demonstrated knowledge required
- Experience in writing enterprise strength Java / J2EE code
- Advanced understanding and experience in Java and OO design

- Enjoy teaching people complex topics
- Expert knowledge of databases (MySQL, Oracle)
- Experience with Websphere, Weblogic, JBOSS AS, or Tomcat
- Solid knowledge of Windows and Linux OS, Servlets or JSP, Spring and Hibernate, application performance and performance tuning
- Prior experience with other portal solutions a plus
- Demonstrates expert analytical and problem-solving skills coupled with very strong motivation to identify and resolve customer issues
- Flexible, proven ability to work well under pressure, meet aggressive deadlines
- Excellent interpersonal skills, both written and verbal
- Strong escalation handling skills; able to facilitate discussion to peacefully resolve conflict
- Familiarity with agile software development lifecycle
- Detailed-oriented
- Works well with distributed team
- Flexible (like Gumby)
- At Least 2-4 years of professional experience.

MetaSquare is the provider of enterprise open source portal and collaboration software products. With offices in North America, Asia, and Australia, MetaSquare offers professional services, technical support, custom development and professional training for many companies worldwide.

Compensation is commensurate with experience and skills. Must be authorized to work in the United States for full-time employment (if applying for the United States).
